

Curriculum Update Grade 5/6 Class February 21st, 2019

Math – Ms. Paul

I have introduced a multiplication drill called a Five Minute Frenzy in which students complete a 10 by 10 multiplication table in 5 minutes. The Alberta Curriculum states that students in Grade 5 should have memorized the times table facts up to 9 times 9.

We will be starting on long division so the times table facts are crucial to success.

Language Arts – Miss Lewis

There is a lot going on in LA class. We were hard at work completing and finishing up good copies of speeches. Students have been working incredibly hard on these and two winners from each Grade have been chosen. We will begin another class novel after speeches. It is expected that students are continuing to read in their own novels daily. If they do not have a personal novel they are to choose one.

French – Miss. Lewis

Currently in French we are working on Les points Cardinaux et la Direction, changing articles, and learning how to explain directions. We also will be starting our animal and sports projects.

Social – Mr. Heikel

We are continuing our journey across the regions of Canada. We are wrapping up the interior plains and will be moving on to the Rockies.

Science – Miss Lewis

We just wrapped up Electricity and Magnetism and are currently starting our Sky Science unit.

If you have any questions or concerns about any of the information in this letter, please contact your teachers directly. Thank you,
